What is analysis?

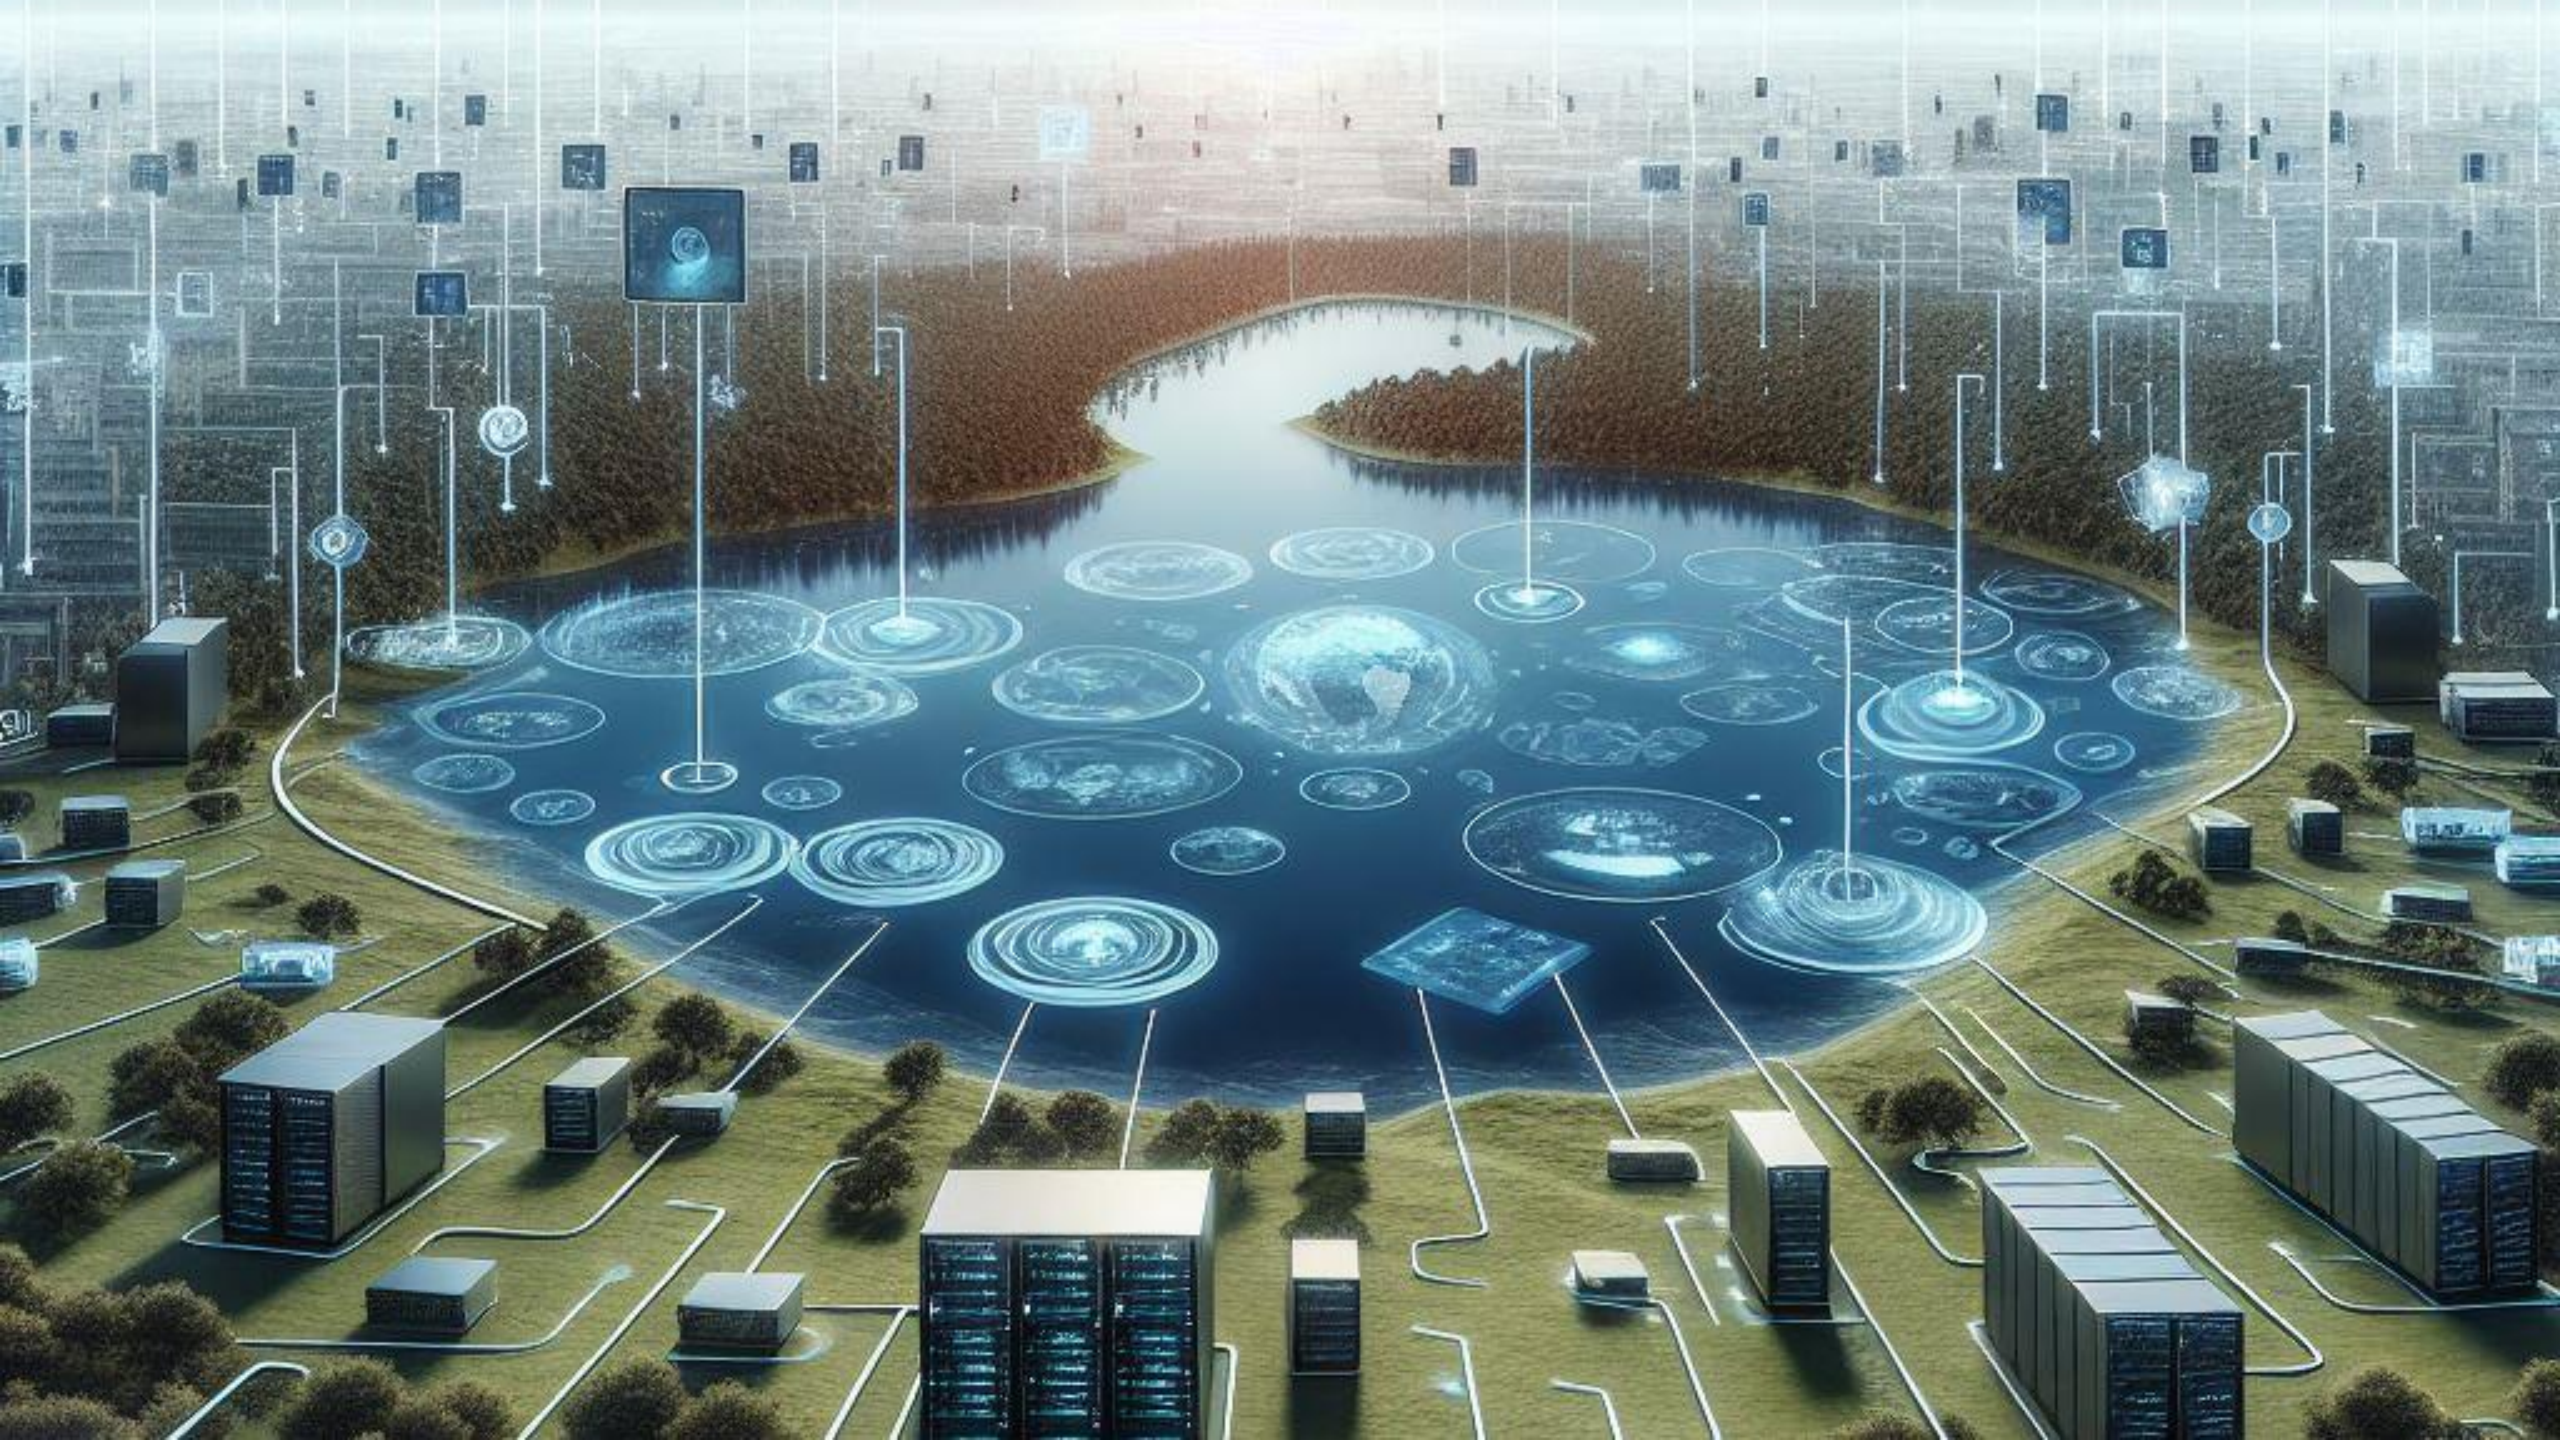

“A detailed examination of anything complex in order to understand its nature or to determine its essential feature”

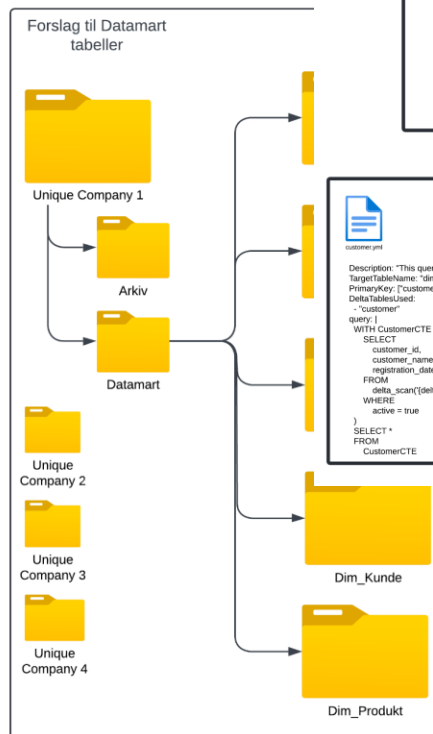

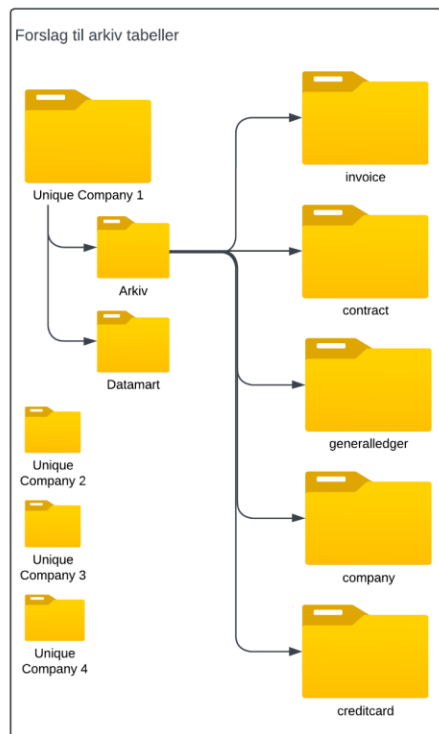

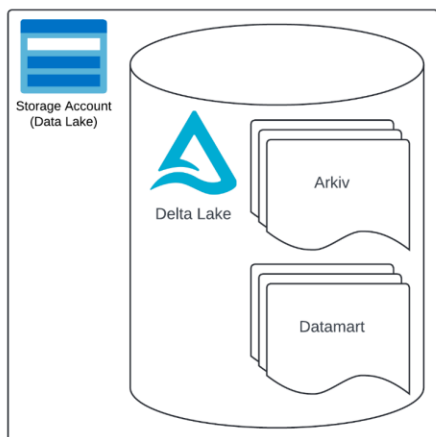

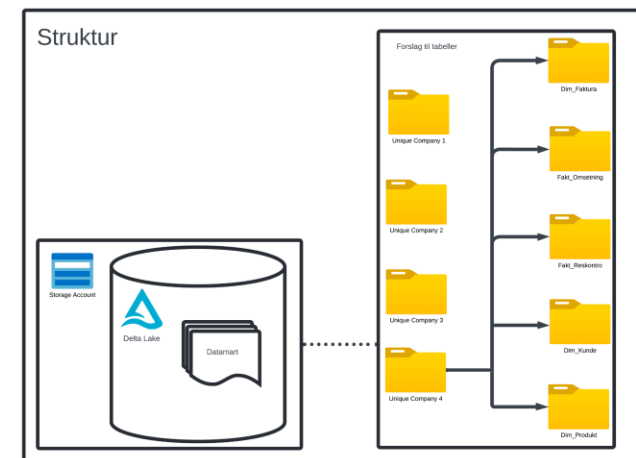

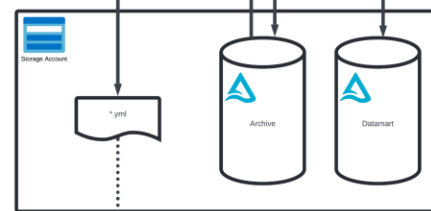

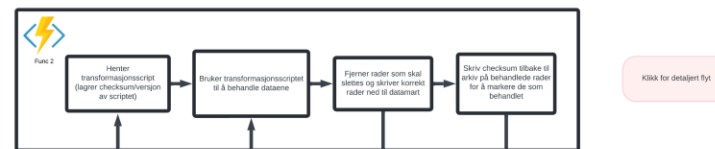

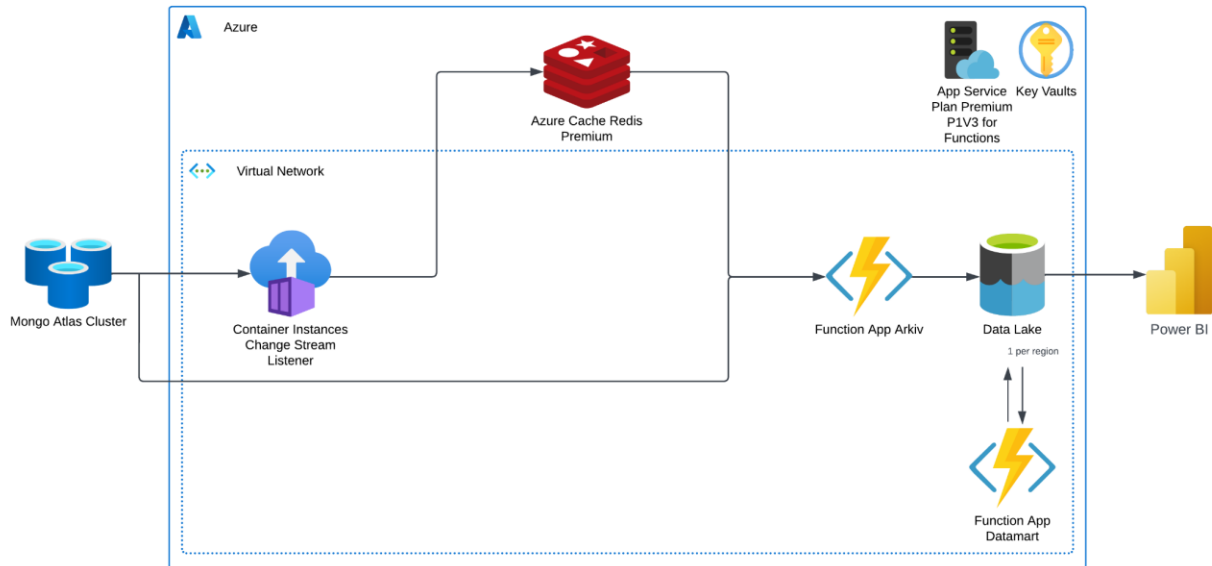

Source: Merriam Webster

From a limited dataset to access to all data

What this means to you

**More data to
analyse**

**Automation
scoring**

**Possibility to
benchmark
with other
eye-share
customers**

Which possibilities this gives Eye-share

**Understand
which features
are used**

**Monitoring
user behaviour
/ patterns**

**Suggest
improvements
and
recommendations
both in app and as
advisory**

What do we want to offer

Even better products

Prognosis on what you can achieve with automations, efficiencies and savings on using features

Better R&D prioritisation in terms of customer importance
